

**Identification of Hazardous Waste Site**

Side Two

**Waste Quantity**

Place an X in the appropriate boxes to indicate the facility types found at the site

In the "total facility waste amount" space give the estimated combined quantity (volume) of hazardous wastes at the site using cubic feet or gallons.

In the "total facility area" space, give the estimated area size which the facilities occupy using square feet or acres.

**Facility Type**

- 1.  Piles
- 2.  Land Treatment
- 3.  Landfill
- 4.  Tanks
- 5.  Impoundment
- 6.  Underground Injection
- 7.  Drums, Above Ground
- 8.  Drums, Below Ground
- 9.  Other (Specify) See below (Electroplating facility-rinse water discharge)

**Total Facility Waste Amount**

cubic feet

gallons

Unknown

**Total Facility Area**

square feet

acres

12.6

**13 A**

See below (Electroplating facility-rinse water discharge)

**G Known, Suspected or Likely Releases to the Environment:**

Place an X in the appropriate boxes to indicate any known, suspected, or likely releases of wastes to the environment.

- Known
- Suspected
- Likely
- None

Note: Items Hand I are optional. Completing these items will assist EPA and State and local governments in locating and assessing hazardous waste sites. Although completing the items is not required, you are encouraged to do so.

**H Sketch Map of Site Location: (Optional)**

Sketch a map showing streets, highways, routes or other prominent landmarks near the site. Place an X on the map to indicate the site location. Draw an arrow showing the direction north. You may substitute a publishing map showing the site location.

**I Description of Site: (Optional)**

Describe the history and present conditions of the site. Give directions to the site and describe any nearby wells, springs, lakes, or housing. Include such information as how waste was disposed and where the waste came from. Provide any other information or comments which may help describe the site conditions.

From 1937 to 1965 the rinse water from the cadmium plating, tin plating and chromating operations were diverted to Rock Run Creek, adjacent to the Goshen, Indiana, property. This practice was terminated in 1965. From 1965 to 1974 this effluent was discharged to the city sanitary sewer system. Beginning in 1974, rinse waters were treated on site-cyanide destruction, chrome reduction PH adjustment and filtration.

**J Signature and Title:**

The person or authorized representative (such as plant managers, superintendents, trustees or attorneys) of persons required to notify must sign the form and provide a mailing address if different than address in item A). For other persons providing notification, the signature is optional. Check the boxes which best describe the relationship to the site of the person required to notify. If you are not required to notify check "Other".
